

EXPLORE V: INTERNSHIP IN VIÑA DEL MAR

Nowadays many corporations are looking for new talent that not only have had a study abroad experience, or knowledge of other languages but also an international working experience. The demand for students to have this type of experience has allowed UVM's International team to develop the Explore V program. It aims to help students find their internship opportunities in the Valparaiso Region while allowing them to build critical skills that will help them succeed in the global landscape.

Explore V is a customized internship program which will provide students with valuable knowledge that can help with their professional development. UVM will appoint a faculty supervisor and workplace mentor focused on helping and guiding the student throughout their internship. Students will also receive an academic transcript, feedback reports, and a final work evaluation.
